

PRESS RELEASE OXIGIN Leichtmetallraeder – OXIGIN 18 Concave in Silver

NEW and WINTERPROOF: OXIGIN 18 Concave now available in Silver

Autumn sees the addition of Silver to the broad colour palette of the bestselling OXIGIN 18 Concave alloy wheel design. As with its Black variant, the OXIGIN 18 Concave in Silver features a fully winterised finish resistant to the ravages of snow, ice and road salt.

Initially the OXIGIN 18 Concave in Silver will be available in the dimensions 7.5x17, 7.5x18, 8.5x18, 7.5x19, 8.5x19, 9.5x19 and 9.0x20-inch sizes for compact to upper-class cars.

Apart from this new Silver variant the classic five-spoke OXIGIN 18 Concave is still available in a wide range of finishes. A few examples are gloss Black and contrasting Black Full Polish, Colour Polish versions, bright neon colours, and the unique Extra Colour variants.

Prices for the new OXIGIN 18 Concave in Silver start at a reasonable 149 euros per wheel.
